

Fire Safety And Fire Extinguisher Training

GOAL: When faced with the decision to flee immediately or choose a fire extinguisher to safely fight a fire, we want the employees educated about making safe decisions.

BENEFITS OF FIRE SAFETY TRAINING: When you have completed this training you will be able to apply the following to your companies Emergency Action Plan (EAP) and Fire Safety Program:

- Operation of fire extinguishers
- Proper housekeeping and maintenance
- Communication systems
- Evacuation plans

HOW THE PROGRAM WORKS: This program gives participants an opportunity to actually use a fire extinguisher in a skills practical session. They will be able to write an evacuation plan and identify hazards in fire safety. This program meets the requirements for OSHA Fire Safety Training.

PROGRAM OUTLINE:

- Employees will learn classifications of fire extinguishers
- Learn how to select the proper fire extinguisher for the fire
- Learn fire safety inspections and how to identify hazards and potential hazards
- Demonstrate how to properly use a fire extinguisher
- Learn the federal requirements for storage and maintenance of extinguishers
- Identify key components in an evacuation plan

METHODOLOGY: This program includes lecture, demonstration, hands-on training, quiz, large group discussions, and video. The course includes a booklet and all equipment and supplies needed to complete the hands-on application.
